

PRODUCT SPECIFICATION - APPLICATION & USE

PRODUCT NAME: **F.L.20**

GENERAL DESCRIPTION: Viscous blue liquid with a neutral odour.

USE FOR WHICH PRODUCT IS INTENDED: A flocculant for paint overspray in water backed spray booths.

SPECIAL EQUIPMENT REQUIRED: Not essential, but can be used through a dosing pump.

METHOD AND CONDITIONS OF USE:

1. Heavily contaminated booths should be thoroughly cleaned before treatment, FL20 will not remove hardened overspray.
2. FL20 can be added either by dose pump or manually to the spray booth sump.
3. For booths running 8-12 hours per day add FL20 at 1 part FL20 to 1000 parts water once a week. For booths running 12-24 hours per day dose twice each week at the same level.
4. Switch off extractor fans when adding FL20.
5. Skim off flocculated paint.
6. For optimum performance the level of FL20 may be decreased or increased.

METHOD OF CONTROL: Adjust level to give type of flocculation required.
