

PRODUCT SPECIFICATION - APPLICATION & USE

PRODUCT NAME: **STAINLESS STEEL CLEANER**

GENERAL DESCRIPTION: Water white acidic liquid.

USE FOR WHICH PRODUCT IS INTENDED: For cleaning and descaling stainless steel equipment.

SPECIAL EQUIPMENT REQUIRED: None.

METHOD AND CONDITIONS OF USE:

1. For removal of light soiling a dilution of 1 part cleaner to 25 parts water should be used.
2. The concentration can be increased for heavier contamination.
3. As a boost, warm or hot water can be used where feasible.
4. The cleaner can be applied by brush, mop or spray. Leave on surface for 30 minutes and agitate with brush if necessary, then wash off thoroughly with clean water.

DESCALING:

Fill the equipment to be descaled with a 50% dilution of the cleaner and where possible bring the temperature up to about 70 degrees centigrade. Leave for between 30 minutes and 1 hour before washing out thoroughly with clean water. Where gross contamination of scale is encountered, a repeat operation may be required.

GENERAL CLEANING:

STAINLESS STEEL CLEANER can also be used for cleaning ceramic tiles, urinals and concrete floors.

METHOD OF CONTROL. Repeat application may be required to ensure complete removal of scale.
