

CA95

Powerful Disinfectant Cleaner

CA95 is a member of our Sanitiser and Degreaser product family. When a situation requires general cleaning, sanitising AND degreasing then CA95 is the product to reach for. Eliminating the need to stock three separate cleaners, this powerful multi-benefit detergent sanitiser cuts through dirt and grease and kills harmful bacteria, algae and fungi.

Suitable for most hard surfaces, particularly those found in toilets, food plants, schools, restaurants, hospitals etc, it can be used to clean floors, walls, ceilings, paintwork and ceramic areas. CA95 has the additional attribute of anti-static properties proving useful when cleaning plastics, for example, light fittings where static often causes soiling. This ensures the surfaces stay cleaner for longer.

Effective against gram positive and gram negative bacteria CA95 is based on quaternary ammonium compounds. CA95 passes BS6471:1984 which is the method of determination of the antimicrobial value of QAC disinfectant formulations at a dilution of 1:100.

This powerful disinfectant cleaner is now available with added perfume for lasting fragrance and is marketed under the name CA95 Special.

- Powerful and fast acting, this safe cleaner and disinfectant saves time
- Kills a wide range of bacteria, using this one product enables total disinfection and saves money
- CA95 is an all round specialist cleaner reducing the need to stock a variety of products. It is suitable for most hard surfaces including walls, floors and work surfaces
- Also available with added perfume where the presence of an odouriser is necessary
