

Carpet Shampoo

Concentrated liquid shampoo for use in rotary scrubbing and extraction carpet cleaning machines

Carpets are expensive to replace and on occasions all that is needed to make a tired and dirty carpet look new again, is a good clean.

As part of our floor care range, Chemaide's concentrated Shampoo negates the need to pre-dissolve powders, which ensures an even mix every time. Designed to deep clean with the aid of a carpet cleaning machine our special blend ensures excellent cleaning properties with low re-soiling.

Effective as a pre-spotting liquid, stains and hard to reach areas can be treated prior to the main clean, and with the addition of a high dilution rate this makes Carpet Shampoo a versatile and economic product.

- Powerful versatile liquid shampoo ensures even mix every time.
- A high dilution rate makes Carpet Shampoo a very economical product
- This one product is suitable for use in rotary scrubbing and extraction cleaning machines.
- Special blend ensures excellent cleaning, with low re-soiling, carpets stay cleaner for longer.

NOTE: Always test a small inconspicuous area of carpet, for colour fastness
