

Cementoff

Cement Remover & Acid Descaler

Cementoff is part of our Industrial Descaler range of products. In the building industry where a variety of equipment becomes contaminated by cement deposits the use of specialised cleaning products is essential. Cementoff is a highly concentrated economical cleaner which rapidly removes thin layers of cement and concrete.

This powerful descaler works immediately upon contact and penetrates deeply to dissolve scale and other deposits. Cementoff contains special agents enhancing its activity on ready mix trucks, scaffold clips, concrete mixers, dumpers, formwork, plant and equipment.

Applied simply by brushing or soaking, this product necessitates no hard scrubbing although some agitation may be necessary to loosen tough deposits. The appliance then requires rinsing with water to remove discarded residues. Cementoff will not only clean machinery but prevent further corrosion from industrial substances.

Cementoff is also suitable for descaling boiler pipework and steam cleaners. The inbuilt special inhibitors aid reduction of bare metal attack.

- Highly concentrated descaler that cleans equipment rapidly
- Contains special inhibitors which reduce bare metal attack

Associated Chemaide Product: Hydropower; Wallclean; Stainless Steel Cleaner
