

Chemsolution

OIL SLICK AND FUEL SPILLAGE REMOVER

Oil and fuel spillages present dangerous road conditions and the need for quick and effective removal is essential. Chemsolution is part of our specialist industrial product group and is the ready made answer to this problem.

Powerful Chemsolution works quickly by being applied directly to the centre of the spillage, allowing the product to spread, and then hosed off with water.

Concentrated and economical, Chemsolution will treat over 100 litres of spilt oil or fuel with every 5 litres of product. Safe and effective for use on, concrete, tarmac and brick surfaces with no adverse effects to vehicles.

Spillages can happen at anytime, anywhere, and ordering a product after the event is not the answer, keeping Chemsolution in stock is.

- Removes oil and fuel spills quickly and efficiently.
- Powerful and economic – 5 Litres treats over 100 Litres of spillage.
- Safe to use.
