

Chemtab-Plus

Detergent Sanitising Tablets

A Unique and highly effective formulation, Chemtab Plus is part of our General Purpose Cleaner/Sanitiser range of products and stands alone in its ingenuity and simplicity.

The accurate use of chlorine and cleaning detergents is wholly dependent upon correct measuring and dilution. Chemtab Plus removes the risk of human error by replacing liquid detergent cleaners and chlorine with Detergent Sanitising Tablets (DST's) which are safe, easy to use and convenient to store .

Highly active against micro-organisms, Chemtab Plus is a combination of a dry Chlorine donor (NaDCC) plus detergent builders and low foaming surfactants.

The dilution rate equates to 1 tablet providing 5 litres of usable fluid, making the product very economical, accurate to measure and easy to use.

Chemtab Plus provides a suitable stable and safe alternative to liquid detergents and Sodium Hypochlorite (Bleach), which is notorious for its instability and rate of degradation.

Convenient, simple and easy to use with no mess, spillages or stains – simply add tablets to water to obtain the required cleaning and disinfection strength.

Chemtab Plus accuracy of solution is assured with each tablet giving a known level of available chlorine (200 ppm in 5 litres) – a factor of extreme importance where effective disinfection is concerned, plus the added cleaning power provided by the impregnated highly effective detergent.

- Unique and ingenious formulation, proving simplicity itself
- Highly effective detergent with the proven sanitising power of Chlorine (NaDCC), result in a clean and fully disinfected application every time
- Accurate dispensing ensures a correct dilution rate, reducing waste and human error
- Kills 99% of all know germs, including C.difficile, MRSA, spores and viruses, resulting in total disinfection from a single tablet
- Effervescent action, gives a fast, highly effective, ready to use, uniform solution
- Quality assured, manufactured under operating conditions of pharmaceutical GMP (Good Manufacturing Practice)
