

Easi-Fix

EPOXY CONCRETE REPAIR MORTAR

Traditional methods for the repair of concrete surfaces are time consuming and prove to be short lived. Easi-Fix is part of our specialist industrial product range, and is the quick and easy answer for a permanent repair of damaged concrete surfaces.

Easi-Fix consists of two parts that are pre-weighed in the correct proportions for easy mixing and because water is not required as the product is an epoxy mix, Easi-Fix affords excellent flexibility, adhesion and a non-shrink repair with the added benefit of low odour.

Strong and permanent Easi-Fix is a high strength product, chemical resistant, and after seven days the compression strength is 75 N/MM², modulus (Compressive) 15 N / MM².

Time saving Easi-Fix is touch cure in 12 hours and is at full service strength in 7 days. Easi-fix is the fast, effective and economical way to repair cracked concrete.

- Easy to use with Pre-measured mix.
- Excellent adhesion, flexibility for a non-shrink repair.
- Time saving, touch dry in 12 hours, full strength in 7 days.
