

## E-Fresh

### Powerful Twin Action Deodoriser, With the Natural Aroma of Vanilla

E-fresh is part of our Deodoriser range of products. To effectively treat a foul smelling area it is important not just to mask offensive odours with a pleasant perfume but also to remove the bacteria which cause the smell. E-fresh kills the bacteria which cause foul smells and leaves your area odour free. Its powerful twin action is a blend of a rapid acting biocide, together with an aromatic and effective odour masking compound. The resulting deodoriser is capable of combating the most objectionable odours.

The fast acting biocide is effective against sulphur reducing bacteria which grow in the absence of oxygen, in situations such as stagnant and semi-stagnant water.

E-fresh is particularly ideal for use in: sewage treatment works, refuse carts/waste transfer stations, dustbin areas/contractors, rubbish heaps, in rooms as a deodoriser and anywhere unpleasant odours occur.

- E-fresh contains a rapid acting bactericide which provides fast odour elimination
- The bactericide and aromatic vanilla deodorises working environments resulting in consistently pleasant working conditions
- The product is suitable for a variety of different site applications so provides economical usage from just one product
