

Emperor

High Quality Beaded Hand Cleaner

Emperor is a member of our Skincare product range. There is no shortage of products available for the cleaning of heavily soiled and greasy hands. Emperor however, is a very different high quality beaded hand cleaner, with a neutral ph ensuring full compatibility to suit all skin types.

The product offers a dual cleaning action by using highly refined pharmaceutical grade white oil, and a specially developed grade of polyethylene beads to provide effectual cleaning capability without scratching or damaging the skin. Emperor is lightly perfumed and contains lanolin bp to give protection to the hands, it can be re-applied to wet hands. As a result of it not containing soap it is easily rinsed off and leaves no unsightly residue around sinks, resulting in cleaner washroom facilities.

A number of hand cleaners contain dyes which can sometimes irritate the skin, therefore Emperor is a dye-free pure white semi-gel containing a blend of powerful skin compatible neutral surfactants to help with dirt removal and easy rinsing.

Emperor is a safe and pleasant means of removing heavy soiling and grease. It is ideal for use in garages, workshops, building sites, printing works, factories, and all areas where operatives are subjected to heavy pollution of dirt or grease.

- Emperor has a neutral ph making it compatible to suit most skin types
- No need to wipe hands between applications as the product can be applied to wet hands, as a result this saves time and materials
- Skin is safely cleansed as the symmetrical polyethylene beads clean without scratching or damaging the hands
- Unlike other hand cleaners based on harsh solvents, Emperor contains highly refined white oil which will not de-fat the skin
