

## Hot Oven Cleaner

### For Effective Cleaning of Ovens, Grills and Hot Plates

Hot Oven Cleaner is a member of our Specialist Industrial product group. Oven cleaning can be difficult at the best of times especially in a commercial environment where time is a premium.

Hot Oven Cleaner has been developed to cut down on valuable time by allowing the use of heat to give maximum effectiveness even on the most stubborn baked on grease.

Used at temperatures between 65 and 85 degrees centigrade Hot Oven Cleaner can be safely and effectively used on vitreous enamel, cast iron, stainless steel chrome, copper and brass.

Simply use by spraying on to the surface, allow Hot Oven Cleaner to liquefy the grease and then rinse with a water saturated cloth, it's that easy. The fast and effective answer to the worst cleaning job in the kitchen, that's Chemaide's Hot Oven Cleaner.

- Fast and effective, saving time and money.
- Versatile, suitable for use on most oven and hot plate materials.
- Easy to use, simply spray on and wipe off.
