

Hydropower

A Powerful Mineral Acid Descaler

Hydropower is a member of our Industrial Descaler product family. Particularly in hard water areas, it is necessary to tackle the build up of unhygienic scale deposits which can harbour bacteria. Hydropower is a powerful, high quality and safe descaler which emits minimal fumes ensuring an improved working environment.

This versatile product is for use in any area where additional descaling strength is required. It can be diluted with water making it economical to use, and is also suitable for the removal of rust and the cleaning of concrete areas. Hydropower is fast and effective and contains inhibitors to minimise its effect on steel although prolonged contact should be avoided.

- Fast and powerful descaler
- Improved working environment due to minimal fume emissions
- Economical as it can be diluted with water

Associated Chemaide Products: Cementoff; Wallclean; Stainless Steel Cleaner
