

Inter-X

Biodegradable Degreaser

Inter-X is part of our Drain Cleansing product range. The regular clearance of drains is particularly necessary where areas are consistently exposed to fat and grease deposits. Inter-X is an excellent natural degreaser for the removal of animal fats, grease, oil and wax.

It is of vegetable origin and contains no petroleum based ingredients. The absence of petroleum makes this product particularly suitable for use in foul water drains. Inter-X combines a powerful odour control in the fast acting and safe solvent to ensure clean degreased drainage systems and no unpleasant odours.

Inter-X forms stable emulsions in water and so is easily rinsed away. It is a biodegradable degreaser most suited to the drainage clearance of fat and grease. This product is an environmentally compatible solvent especially designed to act fast and safely.

- Environmentally friendly degreaser which conforms to legislation by being directly dischargeable into foul water drains
- Powerful degreaser with built-in deodoriser for drainage systems. Regular use will save maintenance time and costs

Associated Chemaide Products: Citrex; X-it; Freeway; Drinklenz; Ramrod
