

Phosclens

Concentrated Cleaner Deodoriser & Disinfectant Descaler

Phosclens is a member of our Hygiene Descaler product family. Scale deposits are unsightly and harbour harmful bacteria. Phosclens eliminates unhygienic scale and kills bacteria leaving your washroom areas clean and fresh. Used in toilets, baths, showers, urinals, sinks, wash hand basins and washroom floors, it is a concentrated acidic cleaner which does not cause corrosion.

The product is as effective as hydrochloric acid based alternatives, however it does not attack stainless steel or chrome finishes. It removes both scale and uric acid deposits in pipes, but may be economically diluted in situations where scaling is lighter.

Phosclens has a pleasant cherry odour, is simple and easy to use, and can be applied by either mop or spray. It contains an effective bactericide but must not be mixed with bleaches or other chemical products.

- Phosclens is an inhibited phosphoric based acid descaler suitable for use on stainless steel and chrome without causing corrosion
- It descales and removes uric acid in pipework reducing maintenance costs
- It kills bacteria and removes organisms which contribute to foul odours
- The cherry perfume is specially selected for its long lasting properties
