Phos-Ex

Thixotropic Cleaner Deodoriser & Disinfectant Descaler

It is important to have a product that will remove scale deposits that are unsightly and will harbour harmful bacteria, and also have the ability to cling to the surface for long lasting protection. Phos-ex is a member of our hygiene descaler family and will quickly eliminate unhygienic scale and kill bacteria leaving your washroom areas clean and fresh. Used in toilets, baths, showers, urinals, sinks, and wash hand basins, it is a thick concentrated acidic cleaner which does not cause corrosion.

The product is as effective as hydrochloric acid based alternatives, however it does not attack stainless steel or chrome finishes. It removes both scale and uric acid deposits in pipes quickly and hygienically.

Phos-ex has a pleasant lemon odour and is simple and easy to use from a handy sized pack. It contains an effective bactericide but must not be mixed with bleaches or other chemical products.

- Phos-ex is a thixotropic inhibited phosphoric based acid descaler, suitable for use on stainless steel and chrome without causing corrosion
- It descales and removes uric acid in pipe work reducing maintenance costs.
- It kills bacteria and removes organisms which contribute to foul odours.
- The lemon perfume is fresh with long lasting properties.
