

Polisheen

High Quality Industrial Floor Polish

Polisheen is a member of our Floorcare product range. Floor surfaces which cope with high volumes of activity need to be hard wearing and durable to maintain a good appearance. Polisheen is a high quality floor polish based on a zinc crosslinked all acrylic polymer which provides excellent durability. It gives surfaces excellent resistance to dirt pick up, scuffing and heel marking.

Surfaces treated with Polisheen will withstand repeated washings and dry to a high gloss finish. The product can be quickly re-coated during application saving time, and shows excellent resistance to powdering. Polisheen responds well to spray buffing as a means of maintaining a floor's freshly polished appearance. The polish can be easily removed by using Chemaide's Polisheen Stripper.

This industrial floor polish is suitable for use on: sealed wooden floors linoleum, rubber, vinyl and thermo-plastic floor coverings.

- Zinc metalised acrylic polymer which is hard wearing and long lasting
- Fast recoating which saves costly labour time
- Suitable for use on a variety of surfaces - only one product required
- Excellent resistance to dirt pick up and scuffing ensuring surfaces stay cleaner for longer
