

ROLL-O-FIX

HIGH PERFORMANCE ADHESIVE ON A ROLL

Roll-o-Fix is part of our specialist industrial product range. The biggest downside in many situations where an adhesive is required, is the waiting time for the product to cure and gain strength. Roll-o-Fix is a multi purpose adhesive on a roll that does not require any time for curing and strengthening.

Roll-o-Fix is economic and easy to apply. Used directly from a 30metre roll, cut to length the amount required, and it is ready to do the job. Roll-o-Fix will bond porous and non porous surfaces together instantly saving time and the need for traditional methods such as nails, screws and liquid glue's.

Suitable for many applications in various business environments, Roll-o-Fix will bond: Wood, Laminates, Carpets, Tiles, Plastics and other materials, making it the perfect product for the building trade.

In the automotive industry the bonding of: Dashboard's, Trims, Carpets and door panels are all made easy with Roll-o-Fix.

Schools, Colleges and Leisure facility site maintenance teams will all benefit by the sheer ease of use to maintain: Notice Boards, Mirrors, Tiles and many more.

Metal to metal bonding, whether similar or dissimilar can be achieved making Roll-o-Fix ideal for Mechanical and Electrical maintenance by securing: Metal labels, Brackets, Sign and Cable trunking on buildings and machinery.

- Simple to use, convenient, multi purpose adhesive on a Roll.
- High strength bonding for all surfaces with no waiting time for curing or strengthening.
- Economic 30 metre roll.
