

# SPECTROKLENZ-*plus*

HIGH QUALITY PERFUMED VERSATILE CLEANER

## PRODUCT DESCRIPTION

### High Quality Perfumed Versatile Cleaner

**Spectroklenz-plus** is part of our Sanitiser and Degreaser range of products. Within the commercial and industrial sectors there is an ever increasing need for safe general purpose cleaners with long lasting re-odorising properties. **Spectroklenz-plus** is a high quality perfumed, multi-purpose cleaner whose versatility reduces the need to stock a large variety of cleaning products.

**Spectroklenz-plus** removes grease, fat, wax, carbons, inks, and dyes and can be economically diluted with water to suit the degree of soiling. This versatile cleaner is deep penetrating, making cleaning faster and easier, leaving behind a pleasant lemon soda fragrance. Designed to leave no sticky residue, it can simply be applied by spray, brush and mop; or wiped onto metals, concrete tiles, rubber, plastics etc.

**Spectroklenz-plus** is non-flammable and biodegradable. It successfully breaks down in water making it suitable for direct discharge into foul water drains.

Special wetting agents break surface tension and allow **Spectroklenz-plus** to penetrate, emulsify and float off the most stubborn grease and dirt, even when carbonised.

- **Spectroklenz-plus is a multi-purpose perfumed cleaner reducing the need to stock a variety of products.**
- **Easy to rinse, this fast acting cleaner leaves no sticky residue so surfaces stay cleaner for longer.**
- **Pleasant and long lasting lemon soda perfume.**
- **The product is non-flammable and as a result special storage facilities are not required.**
