

Stainless Steel Cleaner

Special inhibited Acid Descaler

Stainless Steel Cleaner is part of our Industrial Descaler range of products. Removing scale from a variety of metal surfaces, especially stainless steel equipment requires a specialised product. Chemaide's Stainless Steel Cleaner has been designed to both clean and descale stainless steel, mild steel, brass, copper, aluminium and cast iron without any corrosion.

This powerful descaler may be diluted with water, and to accelerate the descaling and cleaning process, the temperature of the diluted product can be raised to 70 degrees centigrade.

Applied simply by spray, brushing or soaking, this product necessitates no hard scrubbing although some agitation may be necessary to loosen tough deposits. The appliance then requires rinsing thoroughly with water to remove discarded residues.

Stainless Steel Cleaner is also suitable for cleaning and descaling urinals ceramic tiles and concrete floors.

- Descales and cleans stainless steel equipment.
- Highly concentrated descaler that may diluted with water for greater economy
- May be used in warm or hot water to accelerate process, saving time.
