

Stripoff

FAST EFFECTIVE THIXOTROPIC PAINT STRIPPER

Not all paint strippers are the same and many varieties are of a liquid nature reducing their effectiveness and making them difficult to use in critical areas and vertical surfaces. Stripoff is part of our specialist industrial product range and has been specifically developed as a thixotropic solution ensuring maximum hold and performance on vertical surfaces.

Stripoffs specialist formula allows efficient rapid activation, penetration and removal of even the most difficult coatings, including marine quality paints.

Accuracy is ensured when in use, due to Stripoffs excellent holding ability making those difficult jobs such as removal of paint adjacent to areas not requiring treatment or ornate railings.

The action of Stripoff is visual, so you always know how much product is required. No waste and greater economy.

- Highly effective on most paints including marine quality.
- Maximum hold on all surfaces including verticals.
- Visual action means no waste and greater economy.
