

WL21

Mild but Powerful Liquid for Washing Plates, Pots, Pans and Cutlery

WL 21 is a member of our Specialist Industrial product family. Even with the use of dish washing machines in most catering environments, the need for hand washing still arises, adding additional cost and time.

WL21 has been developed to cut down on valuable time when the need for hand washing arises whether in a small or large scale operation. Using a special formulation WL 21 will cut through grease with ease, and after rinsing and left to dry, all washed items will result in a streak free finish, even when used on glass.

Powerful, but mild to the skin, make this product the perfect answer to hand washing, and coupled with high dilution rates, maintain maximum effectiveness and economy.

Fast Superior cleaning in washing up situations, WL 21 delivers every time.

- Powerful grease cutting agents give a fast superior clean.
- High dilution rate saves money.
- Streak free finish, making WL 21 suitable for use on glass.
- Versatile, effective in large or small operations.

Associated Chemaide Products: Automatic Dish Wash; Automatic Rinse aide; Hot Oven Cleaner
