

X-IT

Biodegradable Degreaser

X-it is a member of our Drain Cleansing product range. Drainage systems that are consistently exposed to fat and grease require effective cleaning and reodourising to avoid costly blockages and foul smells. X-it is a powerful degreaser with an in-built reodouriser that tackles and removes substances which can cause clogging in external drains.

Biodegradable and manufactured entirely from vegetable origin, X-it eliminates the pollution associated with petroleum based alternatives. This fast acting solvent combats the effects of fats, grease, oil and wax by forming stable emulsions in water, which are easily rinsed away.

This environmentally friendly product is safe to use and suitable for foul water drains. X-it leaves drains clear of troublesome deposits and free from foul smelling odours.

- Environmentally friendly and safe for use in foul water drains
- An economical fast acting solvent that saves time and money
- This product forms stable emulsions in water that are easily rinsed away
