

Zymask

Natural Biological Odour Digester

Zymask is part of our Deodoriser range of products. Within residential and non-residential care environments, incidents involving vomit, urine, faeces, or the spillage of milk or food are inevitable. The replacement of damaged soft furnishings can be costly and inconvenient. Zymask is a biological odour digester which eliminates the smells associated with such mishaps. It provides an immediate insitu treatment saving on costly replacement of upholstery and carpets.

The product has a pleasant citrus odour, is simple to use and may be applied by sponge, cloth or trigger spray application. It will not harm any materials which are unaffected by the application of water. Zymask is environmentally friendly, non-flammable and may be used neat for fast effective application without the need for dilution.

- Effectively eliminates odours naturally
- No dilution necessary – ready to use
- Safe to use on most carpets and upholstery saving costly replacement
